

 InfoSolutions Patient Medical Information is a network that medical practitioners use to access and store patient medical information on a central repository located at Blue Cross and Blue Shield of Alabama.

- Makes critical information available when patient is unable to respond
- Electronic exchange of data from multiple providers
- Comprehensive list of medications filled at P.O.S. pharmacies
- Immunization records from Blue Cross and Public Health Department

What's Available:

- Major Procedures
- Allergies/Sensitivities
- Chronic Problems
- Immunizations
- Medications
- Lab Results
- Encounter Notes
- Risk Factors
